Ansh Sharma

AGENTIC AI ENGINEER

+91 8269618230 | eranshsharma016@gmail.com | LinkedIn | GitHub | Portfolio | Chhatarpur, Madhya Pradesh, India

Professional Summary

Entry-level Agentic AI Engineer with project experience in multi-service AI application architecture, LLM-provider integration, retrieval workflows and external tool use such as web search and vector search. Built CortexAI, a platform split into gateway, authentication, chat, agent and billing services using LangChain/LangGraph, Node.js and Python APIs, and an AI Video Analyzer that combines transcription, structured extraction and retrieval-augmented question answering. Holds the Oracle Agentic AI Certified Foundations Associate certification. Focused on building reliable AI workflows with clear service boundaries and testable behavior.

Technical Skills

Agent & LLM Frameworks: LangChain, LangGraph (documented project integrations), OpenRouter, LLM-provider integration
Agentic Concepts: tool-augmented workflows, web-search tool integration (Tavily), retrieval as a tool, service-oriented agent architecture, structured extraction
Retrieval & RAG: Qdrant, Chroma, embeddings, transcript chunking, semantic retrieval, grounded question answering
Backend & APIs: Python, FastAPI, Node.js, Express, REST APIs, Streamlit
Data & Infrastructure: MongoDB, Redis, Qdrant
Speech Processing: Whisper, Sarvam AI, chunked audio transcription
Frontend & Workflow Tools: React, Vite, JavaScript, Git, GitHub, Vercel deployments

Projects

CortexAI | **Full-Stack AI Chat Platform** | Repository · Demo

React, Vite, Node.js, Express, LangChain/LangGraph, MongoDB, Redis, Qdrant, Tavily

- Designed and documented a multi-service AI chat platform split into gateway, authentication, chat, agent and billing services, giving each service a single clear responsibility so the system stays understandable as features are added.
- Separated request routing, user and session data, agent functionality and billing concerns through service boundaries, so each part can be changed, tested and reasoned about on its own instead of being tangled into one large application.
- Configured LLM-provider, Tavily web-search and Qdrant vector-search infrastructure to support tool-augmented agent workflows, letting the agent pull in live web results and stored knowledge instead of relying only on the model's built-in knowledge.
- Used MongoDB for user and chat data and Redis for fast session and cache needs, with a React and Vite front end; published a live demo alongside the public repository.

AI Video Analyzer | **Multi-Step Media Analysis Workflow** | Repository · Demo

Python, FastAPI, Streamlit, Whisper, Sarvam AI, OpenRouter, LangChain, Chroma, RAG

- Built a multi-step workflow that turns YouTube videos or audio/video files into transcripts and structured summaries, then generates action items, key decisions and open questions, chaining transcription, LLM extraction and retrieval into one pipeline.
- Implemented transcript-grounded question answering with RAG: transcript chunks are embedded in Chroma, and the most relevant passages are retrieved to give the language model context, keeping answers tied to the source recording rather than guessed.
- Split audio into smaller chunks for transcription so long media can be processed reliably, with English and Hinglish transcription paths through Whisper and Sarvam AI; delivered with a public repository and a deployed demo.

Experience

Artificial Intelligence Intern, CODTECH IT Solutions | Remote — Oct 2024 - Nov 2024

- Worked on AI-agent-related tasks during a remote internship, taking assigned problems and delivering the work independently while communicating progress remotely; used Python, Pandas, NumPy and scikit-learn for data handling and model-building tasks.

Leadership Experience

Community Lead & Founding Member | Google Developer Groups (GDG/GDSC), SAGE University, Indore — 2024 - 2025

- Helped build, engage and nurture the campus developer community through collaborative initiatives, supporting a welcoming, growth-oriented tech ecosystem where students at different levels could learn from each other and share what they were building.

Education

SAGE University, Indore · B.Tech Computer Science and Engineering (Core), CGPA 8.03/10 · 2022 - 2026
Rani Durgabati Higher Secondary School · Class XII
Government Model Higher Secondary School, Chhatarpur, Madhya Pradesh · Class X

Certifications

Oracle University: Agentic AI Certified Foundations Associate (Jul 2026; valid through Jul 2028) · **Tata / Forage:** GenAI Powered Data Analytics Job Simulation (Jul 2026) · **JPMorgan Chase / Forage:** Quantitative Research Job Simulation (Jul 2026) · **Quantium / Forage:** Data Analytics Job Simulation (Jul 2026) · **be10x:** AI Tools and ChatGPT Workshop (Jun 2026)
