PROFESSIONAL SUMMARY

Entry-level Machine Learning Engineer candidate with hands-on project work in credit-risk prediction, preprocessing pipelines, classification workflows and LSTM-based text generation. Familiar with Python data libraries, scikit-learn, FastAPI inference APIs and model-backed web applications. Interested in applying data-driven methods to practical prediction problems.

TECHNICAL SKILLS

• Programming & data: Python, Pandas, NumPy

• Machine learning: scikit-learn, Extra Trees, classification, preprocessing pipelines, probability-based prediction

• Deep learning & NLP: TensorFlow/Keras, LSTM, tokenization, TensorFlow.js

• Backend & deployment: FastAPI, REST APIs, Joblib, Git, GitHub

• Web technologies: HTML, CSS, JavaScript, Vite

PROJECTS

CortexAI — Full-Stack AI Chat Platform | React, Vite, Node.js, Express, LangChain/LangGraph, MongoDB, Redis, Qdrant, Tavily

• Designed/documented a full-stack AI chat platform organized into gateway, authentication, chat, agent and billing services.

• Configured LLM-provider, web-search and vector-search integrations to support extensible AI application workflows.

• Repository: https://github.com/Ansh01612/cortexai | Demo: https://cortex-ai-rho-khaki.vercel.app/

Credit Security Risk Relay | Python, scikit-learn, Extra Trees, Pandas, FastAPI, Joblib

• Developed a credit-risk prediction application for individual assessment and batch CSV scoring.

• Used a trained Extra Trees classifier and preprocessing pipeline for categorical and numerical applicant/loan attributes.

• Documented nine input fields and a prediction API; the fitted pipeline handles missing savings-account values.

• Repository: https://github.com/Ansh01612/credit-security-riskrelay | Demo: https://credit-security-riskrelay.vercel.app/

Risk for Loan | Python, Pandas, FastAPI, Pydantic, HTML, CSS, JavaScript

• Built a loan-default probability prototype accepting borrower and loan details through a web interface.

• Integrates a saved classification model and decision threshold to produce a probability-based high-risk/low-risk label; exact algorithm and metrics need verification.

• Repository: https://github.com/Ansh01612/risk-for-loan

Next Thought — LSTM Sentence Generator | TensorFlow/Keras, LSTM, TensorFlow.js, JavaScript, Vite

• Created a browser-based next-word and sentence generation demo using an LSTM model and tokenizer.

• Browser inference processes prompts on-device; model and tokenizer assets total approximately 6.8 MB.

• Repository: https://github.com/Ansh01612/-LSTM-Next-Word-Sentence-Generator | Demo: https://nextwordpred.vercel.app/

EXPERIENCE

Artificial Intelligence Intern | CODTECH IT Solutions | Remote | Oct 2024 – Nov 2024

• Worked on AI-agent-related tasks during a remote internship.

• Technologies reported: Python, Pandas, NumPy and scikit-learn.

LEADERSHIP EXPERIENCE

Community Lead & Founding Member | Google Developer Groups / Google Developer Student Club, SAGE University, Indore | Academic year 2024–2025

• Helped build, engage and nurture the campus developer community through collaborative initiatives.

• Supported a welcoming, growth-oriented tech ecosystem on campus.

EDUCATION

Class X: Government Model Higher Secondary School, Chhatarpur, Madhya Pradesh

Class XII: Rani Durgabati Higher Secondary School

B.Tech, Computer Science and Engineering (Core) | SAGE University, Indore | 2022–2026 | CGPA: 8.03/10

CERTIFICATIONS

• Oracle University — Agentic AI Certified Foundations Associate (Jul 2026; valid through Jul 2028)

• JPMorgan Chase / Forage — Quantitative Research Job Simulation (Jul 2026)

• Tata / Forage — GenAI Powered Data Analytics Job Simulation (Jul 2026)

• Quantium / Forage — Data Analytics Job Simulation (Jul 2026)

• be10x — AI Tools and ChatGPT Workshop (Jun 2026)
